P R E F A C E.

A BOOK containing a sufficient number of figures to assist conchologists in the determination of the shells they may occasionally acquire, has long been a desideratum.

We have, it is true, the extensive work of Martini and Hemnitz, the more confined publications of Knorr, of Faustieri, of Rugenfuss, Lister, Rumphius, Petiver, and others; but in no instance, except the first-mentioned, has any attempt been made to include a figure of every species. The great expense attending such publications, and the want of sufficient encouragement in purchasers, has hitherto operated to prevent the accomplishment of so desirable an undertaking. It has therefore been the endeavour of the Author, in the absence of larger and more costly publications, to supply their place by a work which will incorporate in one volume figures of all the known shells, reduced indeed to a small size, but with a degree of accuracy that it is hoped, will not only enable the conchologist to fix upon any particular species he may wish to define,

but also to arrange his collection by inspection, without the trouble of consulting other publications on the subject.

The plan followed in the present undertaking has been to give *one* characteristic figure of each species, and the arrangement adopted has been that of Linnæus. The Author is well aware that in this age of general novelty he shall be censured by the young, and perhaps by the experienced conchologist, for adhering too tenaciously to the principles of his early master; but let it be remembered, that all systems built on artificial foundations must be liable to objection, and that it still remains to be proved whether the present innovators had not better have trusted to the Linnean method, with such additions and divisions as its great author might be supposed to have made had he now been living, than, by an extreme multiplication of the genera, rather to increase than remove the difficulty of determining the species.

With a desire in some measure to accommodate those who have adopted the French arrangement, the Author has added the divisions of Lamarck, referring his genera to the figures in the *Index Testaceologicus*.

It may not be improper to remark that all the plates (with the exception of the first six by that excellent artist

the late Mr. Sowerby) have been executed under the immediate inspection of the Author, and every attention paid to make the figures as accurate as possible. To accomplish this purpose recourse has always been had to the shells whenever they could be procured, so that the figures are for the most part original. And here the Author has great pleasure in acknowledging his obligation to Mrs. Mawe, Mr. J. and Mr. G. B. Sowerby, who with their usual liberality have allowed him the free use of their extensive collections towards the completion of his task.

Each page of the Index is divided into five columns. The first contains the Linnean names : the second, a reference to the page in Gmelin's enlarged edition of the *Systema Naturæ*, where the descriptions of such shells as were noticed by that editor will be found. The English names occupy the third column : the fourth refers to some of the principal authors whose figures have an established reputation ; and in the fifth division will be seen the name of the place where every shell is to be found.

The figures of Montagu and Donovan have been constantly quoted for the British shells, and where the species is confined to Britain, the word alone is mentioned ; but where it occurs also in other parts of the world, it is de-

noted by “ Britain, &c.” Thus the shells that have been observed on our coasts will be immediately detected.

With regard to the Plates, it must be noticed that several shells have been named by authors without any reference to figures, and which are too obscurely described to be identified. This will account for the gaps which occasionally appear in the numbering of the plates. Thus in Plate I. we pass from No. 27 to 29; in Plate II. from 17 to 19, and from 21 to 23, &c. It must also be noticed, that in some instances the figures are misplaced, such as No. 23 of Plate I., the engraver having forgotten it till he had finished No. 37.

As a guide to the comparative size of the different shells, a mark or a letter of the alphabet is added after the number engraved on the plate. Thus + indicates a shell half an inch long; + three-quarters of an inch; *a* an inch; *a* an inch and a quarter; *a* + an inch and a half; *a* + an inch and three-quarters; *b* two inches; *c* three inches, and so on: *n* denotes shells of the natural size; and *m* such as are magnified. Thus in Plate I. figure 15 is an inch long; fig. 16, an inch and a quarter; fig. 4, an inch and a half; fig. 1, two inches; fig. 27, three-quarters of an inch; fig. 29, the natural size. In the genus *Nautilus*, Plate 13, all the figures, except three, are magnified.

A SYNOPTIS
OF
THE LINNEAN GENERA.

1. CHITON.—Plate 1.

Animal, a Lophyrus.

Shell, multivalve (valves or plates), generally eight, arranged longitudinally; moveable on each other, like the joints in the tail of a lobster; connected by a projecting coriaceous border, which is either plain, spinous, or scaly.

2. LEPAS.—Plate 1.

Animal, a Triton.

Shell, multivalve, either conical or compressed, formed of several valves: the conical shells are sessile, strongly fixed at the base, and the valves are articulated or joined to each other by delicate sutures. The compressed shells are not articulated, but connected by a membrane, and supported on a flexible retractile pedicle.

3. PHOLAS.—Plate 2.

Animal, an Ascidia.

Shell, multivalve, consisting of two principal valves, with several smaller accessory valves on the hinge. Hinge recurved, united by a cartilage, and having a strong incurved tooth in one valve. Shell always gaping at one end, generally at both.

4. MYA.—Plate 2.

Animal, an Ascidia.

Shell, bivalve, generally gaping at one end. Hinge, for the most part, with a single solid, thick, broad tooth, strongly attached by cartilage, but not inserted into the opposite valve.

5. SOLEN.—Plate 3.

Animal, an Ascidia.

Shell, bivalve, equivalve, elongated transversely; open at both ends. Hinge with an awl-shaped reflex tooth, often double; not inserted into the opposite valve.

6. TELLINA.—Plate 3.

Animal, a Tethys.

Shell, bivalve, generally flattish, sometimes orbicular, anterior end often produced into an angular beak. Hinge usually with three teeth; lateral teeth in one of the valves flat; often remote.

7. CARDIUM.—Plate 5.

Animal, a Tethys.

Shell, bivalve, equivalve, nearly equilateral, somewhat heart-shaped, ribbed longitudinally; beaks prominent, valves toothed or plaited on their internal margin. Hinge with four teeth in each valve; the two cardinal teeth near together, and alternating with the opposite; the two lateral teeth remote and inserted.

8. MACTRA.—Plate 6.

Animal, a Tethys.

Shell, bivalve, valves unequal at the sides; subtriangular; beaks prominent. Hinge with the middle tooth spoon-shaped, having a small cavity on each side; lateral teeth remote, locking into the opposite valves.

9. DONAX.—Plate 6.

Animal, a Tethys.

Shell, bivalve, equivalve, of unequal sides, the anterior side very short and very obtuse; generally crenulated on the margin. Hinge with two cardinal teeth, either on each valve, or on one only: a single remote lateral tooth in the posterior side.

10. VENUS.—Plate 7.

Animal, a Tethys.

Shell, bivalve, equivalve, with a heart-shaped depression on the cartilage slope. Hinge with three approximate teeth in each valve, the lateral ones inclining a little outwards.

11. SPONDYLUS.—Plate 9.

Animal, a Tethys.

Shell, bivalve; valves unequal, eared, spiny or rugged; one convex, the other rather flat and adherent. Hinge with two strong recurved teeth in each valve, and an intermediate hollow for the ligament.

12. CHAMA.—Plate 9.

Animal, a Tethys.

Shell, bivalve, irregular; beaks recurved, unequal. Hinge with a single oblique tooth, thick and coarse; articulated into a cavity in the opposite valve. Two muscular impressions in each valve.

13. ARCA.—Plate 9.

Animal, a Tethys.

Shell, bivalve, equivalve; beaks prominent, and separated by a channel. Hinge, composed of numerous teeth, inserted into the interstices of the opposite valve. Muscular impressions two in each valve.

14. OSTREA.—Plate 10.

Animal, a Tethys.

Shell, bivalve, irregular; valves unequal and somewhat eared. Hinge without teeth, but having a strong elastic ligament inserted into a hollow in the valves.

15. ANOMIA.—Plate 11.

Animal, a Tethys?

Shell, bivalve; fixed, and irregular; valves unequal, the lower one with a hole at the base, which is stopped by a testaceous plug at the will of the animal. Hinge without teeth, valves united by ligaments.

16. MYTILUS.—Plate 12.

Animal, an Ascidia?

Shell, bivalve, equivalve, fixed by a silky byssus; the beaks nearly strait, terminal and pointed. Hinge lateral, generally without teeth. Ligament marginal; muscular impression long and sublateral.

17. PINNA.—Plate 12.

Animal, a Limax.

Shell, bivalve, equivalve, wedge-shaped, gaping at the summit, pointed at the base; beaks strait. Hinge lateral, without teeth, ligament marginal, linear, and very long.

18. ARGONAUTA.—Plate 13.

Animal, a Clio.

Shell, univalve, unilocular, involute, boat-shaped; very thin. Spire double-keeled, tuberculated.

19. NAUTILUS.—Plate 13.

Animal, a Cephalopode?

Shell, univalve, spiral, multilocular, the chambers formed by transverse divisions, which are concave, and communicate with each other by a small tubular aperture.

20. CONUS.—Plate 14.

Animal, a Limax.

Shell, univalve, convoluted, turbinated; aperture longitudinal, linear, without teeth, terminated at the summit by a slope; base entire: pillar smooth.

21. CYPRÆA.—Plate 17.

Animal, a Limax.

Shell, univalve, involuted, suboval, obtuse, smooth; aperture longitudinal, linear, toothed or wrinkled on both sides; base strait and open.

22. BULLA.—Plate 18.

Animal, a Limax.

Shell, univalve, convoluted, without teeth, oval; aperture for the most part the whole length of the shell, entire at the base: often without any spire.

23. VOLUTA.—Plate 19.

Animal, a Limax.

Shell, univalve, oval, more or less ventricose, spiral; aperture sloping and without a canal: pillar plaited, the lower plaits the largest and most oblique.

24. BUCCINUM.—Plate 22.

Animal, a Limax.

Shell, univalve, spiral, gibbous; aperture ovate, ending in a short canal leaning to the right, with a beak or projection turned backwards: pillar-lip expanded.

25. STROMBUS.—Plate 24.

Animal, a Limax.

Shell, univalve, spiral, ventricose; aperture dilated and terminating in a canal leading to the left: outer lip mostly expanding with age into a wing, or into long and pointed claws.

26. MUREX.—Plate 25.

Animal, a Limax.

Shell, univalve, spiral, oval, or oblong; channeled at the base; canal strait and entire, sometimes slightly reflected. Externally studded with spines, tubercles, or folds.

27. TROCHUS.—Plate 28.

Animal, a Limax.

Shell, univalve, conical, spiral; aperture more or less angular, transversely contracted: pillar placed obliquely.

28. TURBO.—Plate 30.

Animal, a Limax.

Shell, univalve, spiral, solid; aperture contracted, orbicular, entire.

29. HELIX.—Plate 32.

Animal, a Limax.

Shell, univalve, spiral, subdiaphanous, brittle; aperture entire, contracted, semilunar or roundish.

30. NERITA.—Plate 35.

Animal, a Limax.

Shell, univalve, solid, somewhat globular, flat beneath; aperture semiorbicircular: pillar-lip oblique relative to the axis of the shell, flattish, truncate, and often toothed; inner lip frequently toothed or crenulated.

31. HALIOTIS.—Plate 36.

Animal, a Limax.

Shell, univalve, ear-shaped, generally flattish; spire lateral, very short; aperture nearly as large as the shell; disk perforated by a row of pores in a line parallel to the edge.

32. PATELLA.—Plate 37.

Animal, a Limax.

Shell, univalve, more or less conic, without a spire.

33. DENTALIUM.—Plate 38.

Animal, a Terebella.

Shell, univalve, tubular, slightly arched, lessening insensibly towards the extremity, and open at both ends.

34. SERPULA.—Plate 38.

Animal, a Terebella.

Shell, univalve, tubular, generally affixed to other bodies, open only at the anterior extremity.

35. TEREDO.—Plate 38.

Animal, a *Terebella*.

Shell, a cylindrical tube, taper, and flexuous: two testaceous hemispherical valves, truncated on the fore part, and wholly independent of the tube, are attached to the head of the animal. There are also two lanceolate valves near the tail.

XXII. BULLA. DIPPER.

1 <i>Ovum</i>	3422 Egg	<i>L.t.711, f. 65. G. t. 15, f.A.B. C.1, t.22, f.205-6. E.M.t.358, f.1.</i>	Amboyna.
2 <i>imperialis</i>	crumpled	<i>M.U.C.t.60.</i>	Friendly Islands.
3 <i>Volva</i>	3422 Weaver's-shuttle	<i>L. t. 711, f. 63. F. t. 30, f.K.2. C.1, t.23, f.218-19. E.M.t.357, f.3.</i>	Japan.
4 <i>carnnea</i>	3434 flesh-colour.	<i>E.M.t.357, f.2.</i>	Africa.
5 <i>levida</i>	orange-coloured	<i>P.G.t.66, f.2,3.</i>	Leghorn.
6 <i>birostris</i>	3423 lesser-shuttle	<i>F.t.30, f. K.1. C. 1, t.24, f.217.a.b. E.M.t.357, f.1.a.b.</i>	China.
7 <i>Secale</i>	Rye-shaped	<i>L.t.711, f.66.</i>	West Indies.
8 <i>patula</i>	patulous	<i>D.4, t. 142. M.p.207.</i>	Britain.
9 <i>Spelta</i>	3423 oblong	<i>L.t.712, f.68. G.t.15, f.4. C.t.23, f.215-16.</i>	Mediter.
10 <i>verrucosa</i>	3423 warty	<i>L. t. 712, f. 67. G. t. 16, f. F. C. t. 32, f. 220-1. E.M.t.357, f.5.</i>	Amboyna.
11 <i>gibbosa</i>	3423 belted	<i>L. t. 711, f. 64. G. t. 15, f.3. C.1, t.22, f.211-14. E.M.t.357, f.4.</i>	Brazil.
12 <i>Naucum</i>	3424 Sea-nut	<i>L. t. 714, f. 73. G. t. 13, f.G.G. C.1, t.22, f.200-1. E.M.t.359, f.5. a.b.</i>	Amboyna.

<i>Linn. names.</i>	<i>Gm.</i>	<i>Engl. names.</i>	<i>Synonyms.</i>	<i>Habitat.</i>
13 ferruginosa	3432	rust-spotted	<i>C.1, t.22, f.209-10.</i>	v.
14 aperta	3424	wide	<i>C. 10, t. 146, f. 1354-5.</i> <i>D. 4, t. 120. M.p.208.</i> <i>Vign.2, f.1-4.</i>	<i>Britain, &c.</i>
15 Catena		Chain	<i>M.p.215, t.7, f.7.</i>	—
16 Plumula		Feather	<i>M. p. 214, t. 15, f. 9. &</i> <i>Vign.2, f.5.</i>	<i>Britain.</i>
17 Hydatis	3424	Paper	<i>G.t.13, f.D.D. C.1, t.21,</i> <i>f. 119 & 11, t. 118,</i> <i>f.1019.</i>	
18 Ampulla	3425	Pewit's egg	<i>L. t. 713, f. 69 & t. 1056,</i> <i>f.3. G.t.12, f. E. C. 1,</i> <i>t. 21, f. 188-93. E.M.</i> <i>t.358, f.3.a.b.</i>	<i>Amboyna.</i>
19 Amygdalus	3425	β Almond	<i>L. t. 714, f. 72: G. t. 12,</i> <i>f.F.I. C.1,t.22,f.202-4.</i> <i>E.M.t.358, f.2.a.b. M.</i> <i>p.206,t.7,f.1.Ampulla.</i>	
				<i>W. Indies.</i>
20 lignaria	3425	brown- striated	<i>L.t.714, f.71. C. 1, t. 21,</i> <i>f. 194-5. E. M. t. 359,</i> <i>f.3. M.p.205.</i>	<i>Britain, &c.</i>
21 pectinata		pectinated	<i>M.Z.D.2, p.41, t.71, f.10.</i> <i>E.M.t.360, f.3.a.b.c.</i>	
				<i>C. of Denmark.</i>
22 soluta	3434	unsealed	<i>C.10, t.46, f.1359-61.</i>	<i>Ceylon.</i>
23 Akera	3434	elastic	<i>C. 10, t. 146, f. 1358. D.</i> <i>t.79. M.p.219.</i>	<i>Britain, &c.</i>
24 Physis	3425	striped	<i>G.t.13, f.F.F. C. 1, t. 21,</i> <i>f. 196-7. E. M. t. 359,</i> <i>f.4.</i>	<i>E. Indies.</i>

<i>Linn. names.</i>	<i>Gm.</i>	<i>Engl. names.</i>	<i>Synonyms.</i>	<i>Habitat.</i>
25 nitidula		brittle	<i>L.t.715, f.74. C.1, p.274, f.4,5.</i>	W. Indies.
26 Amplustre	3426	banded	<i>C. 10, t. 146, f. 1350-1. E.M.t.359, f.2.</i>	China,
27 Velum	3433	zoned	<i>C. 10, t. 146, f. 1348-9. E.M.t. 359, f. 1.a.b.</i>	Tranquebar,
28 scabra	3434	rough	<i>C.10, t.146, f.1352-3.</i>	Java.
29 Ficus	3426	Fig	<i>L. t. 750 & 751. G. t. 26, f.M. C.3, t.66, f.733-5. E.M.t.432, f.1,2.</i>	Amboyna,
30 Pyrum		Pear	<i>L. t. 877, f. 1. C. 3, t. 66, f.736-7.</i>	U.
31 Rapa	3426	turnip-shap.	<i>C.3, t.68, f.747-9.</i>	China.
32 canaliculata	3427	channelled	<i>L.S.N.p.1185.</i>	U.
33 conoidea	3427	conoidal	<i>L.S.N.p.1185.</i>	U.
34 Voluta	3433	volute	<i>C.9, t.117, f.1009-10.</i>	U.
35 Dominicensis	3433	nine-whirled	<i>C.9, t.117, f.1011.</i>	St. Domingo,
36 crassula		reversed	<i>L.t.135, f.35. C.9, t.103, f.879-80.</i>	W. Indies.
37 fontinalis	3427	fresh-water	<i>L. t. 134, f. 34. G. t. 5, f.C.C. D.5, t.168, f. 2. M.p.226. Rivers in Britain, &c;</i>	
38 rivalis		river	<i>F.t.61, f.E.6. C.9, t.103, f.877-8, M.Supp.l.p.97.</i>	Britain, &c.

<i>Linn. names.</i>	<i>Gm.</i>	<i>Engl. names.</i>	<i>Synonyms.</i>	<i>Habitat.</i>

1828.

PRINTED BY RICHARD TAYLOR,
RED LION COURT, FLEET STREET.

P R E F A C E.

IN submitting the following **SUPPLEMENT** to the Public, it will be proper to remark, that the plan pursued in the *Index Testaceologicus* has been continued for the sake of uniformity, though liable to an objection with respect to the first column.

It appears absurd that the word Linnean names, should be continued to shells wholly unknown to Linneus; yet as the arrangement is Linnean, the head could not well be dispensed with, without injury to the body.

It will be seen by a reference to the third column, that the majority of the shells have been figured from specimens in the British Museum, and the names attached to them in that collection have been adopted. For the rest, except such as have been derived from books, the Author gratefully acknowledges the assistance of Mrs. Mawe, and Mr. Gray, from whose Cabinets, and principally from the former he has derived the most essential benefit.

It is to be hoped that an inspection of the Plates, and a careful comparative examination of the Figures, will leave the Subscribers at least as well satisfied with the second part of the Index, as they have kindly professed themselves to be with the first.

The additional list of Lamarckian names, adapted to the plates and figures in the *Index Testaceologicus*, has been extracted from the three last volumes of the “*Animaux sans Vertèbres*”; and the Genera have been arranged alphabetically for the convenience of reference.

As a guide to the comparative size of the different shells, a mark or a letter of the alphabet is added after the number engraved on the plate. Thus + indicates a shell half an inch long; + three-quarters of an inch; a an inch; a an inch and a quarter; a + an inch and a half; a + an inch and three-quarters; b two inches; c three inches, and so on: n denotes shells of the natural size; and m such as are magnified.

CHAMA.

CLAMP.

1 angulata	angular	<i>Br.Mus.</i>	N. Holland.
2 restrata	beaked	—	u.
3 incrassata	heavy, grooved	—	—
4 Australis	Cockle	—	N. Holland.
5 crassicostata	thick-ribbed	—	u.
6 pectinata	comb-shaped	—	—

ARCA.

ARK.

1 Americana	regular shaped	<i>Br.Mus.</i>	Bay of Campeachy.
2 semitorta	winged	—	u.
3 cylindrica	cylindric	—	—
4 obliquata	mussel-shaped	—	—
5 tellinoides	tellen-shaped	—	Cumana.
6 glacialis	small brittle	—	North Sea.
7 Braziliania	Brazilian	—	Brazil.
8 nodosa	tuberculated	—	u.
9 Rostrum	hoe-shaped	—	—

<i>Linn. names.</i>	<i>Engl. names.</i>	<i>Synon. & Ref.</i>	<i>Habitat.</i>
10 elongata	lengthened	<i>Br.Mus.</i>	u.
11 pectiniformis	pecten-shaped	—	—
12 squamosa	scaly	—	—

OSTREA. **OYSTER.**

1 asperrima	roughish	<i>Br.Mus.</i>	South Sea.
2 muscosa	prickly	—	—
3 Tegula	tile-ribbed	<i>M.Cab.</i>	u.
4 ornata	mottled	—	Tranquebar.
5 subauriculata	little-eared	<i>Br.Mus.</i>	Great Britain.
6 elliptica	shapeless	—	Nile Fr. w.
7 gigantea	gigantic	—	u.
8 angulata	angular	—	Africa.

ANOMIA. **ANOMIA.**

1 dentata	toothed	<i>Br.Mus.</i>	u.
2 ostreoides	oyster-shaped	—	Africa.
3 rosea	rose-coloured	—	N. Holland.
4 rubra	red-coloured	<i>M.Cab.</i>	East Indies.

MYTILUS. **MUSSEL.**

1 Niloticus	Nilotic	<i>Br.Mus.</i>	Nile Fr. w.
-------------	---------	----------------	-------------

<i>Linn. names.</i>	<i>Engl. names.</i>	<i>Synon. & Ref.</i>	<i>Habitat.</i>
2 dilatatus	dilated	<i>Br.Mus.</i>	u.
3 castaneus	chestnut	—	China.
4 Folium	leafy	—	u.
5 lævigatus	Northern	—	Polar Seas.
6 Volgensis	mottled	—	Volga. Fr.w.

CONUS. CONE.

1 brunneus	brown	<i>M.Cab.</i>	u.
2 interruptus	dotted	—	—
3 gracilis	slender	—	Timor.
4 lucidus	bright	—	South Sea.
5 Balteus	girdled	—	u.
6 gradatus	interrupted	—	California.

CYPRÆA. COWRY.

1 tessellata	painted	<i>M.Cab.</i>	S. Seas.
2 lactea	milky	—	—
3 sulcidentata	strong-toothed	—	—
4 Listeri	ocellated	—	—
5 arenosa	sand	—	—
6 Turdus	thrush-backed	—	—

THE END.

LONDON:
PRINTED BY RICHARD TAYLOR,
RED LION COURT, FLEET STREET.

BOOKS IN NATURAL HISTORY,

PUBLISHED BY

WILLIAM WOOD, 428, STRAND.

INDEX TESTACEOLOGICUS, or A Catalogue of Shells, British and Foreign, arranged according to the Linnæan System, with the Latin and English Names, References to Authors, and Places where found. Illustrated with 2300 figures. By W. Wood, F.R.S. F.L.S., Author of "Zoography," "General Conchology," &c. &c. *Lond.* 1828, second edition. 8vo. boards. 2*l.* 12*s.* 6*d.*; or with the plates coloured, 5*l.* 5*s.*

The figures contained in this volume are for the most part original, and have been drawn from specimens with the greatest possible attention to accuracy. All Shells, even the most minute, that have been noticed as British by Montagu, Donovan, Walker and others, as well as all the Foreign Species described in the volumes of Martini and Chemnitz, &c., have been introduced. The divisions of Lamarek have been added, and his Genera referred to the figures in the Catalogue.

ZOOGRAPHY, or the Beauties of Nature displayed in select Descriptions from the Animal and Vegetable, with additions from the Mineral Kingdom. Systematically arranged by W. Wood, F.L.S. 1807, 3 vols. 8vo. plates, bds. 3*l.* 13*s.* 6*d.* THE SAME, large paper, boards, 6*l.* 6*s.*

GENERAL CONCHOLOGY, or a Description of Shells, arranged according to the Linnæan System, and illustrated with plates drawn and coloured from Nature. By W. Wood, F.R.S. F.L.S. *Lond.* 1815. royal 8vo. vol. 1, boards, 3*l.* 10*s.* THE SAME, on fine drawing paper, 4*l.* 18*s.*

This volume is composed of the genera of Shells in a regular Linnaean series, from *Chiton* to *Cardium*. Each genus is complete in itself, and contains many new and rare shells that have not hitherto been noticed. The plates are faithfully drawn and coloured from original specimens, by Mr. Sowerby.

Books Published by W. Wood, 428, Strand.

ILLUSTRATIONS OF THE LINNÆAN GENERA OF INSECTS.
By W. Wood, F.R.S. F.L.S. 2 vols. 12mo. with 86 coloured plates,
boards, 1*l.* 10*s.*

This work contains, besides the Generic Characters, and general observations on each genus, a method of catching and preserving Insects for collections, and also an explanation of the principal terms used in Entomology.

THE BRITISH FAUNA; containing a Compendium of the Zoology of the British Islands, arranged according to the Linnaean System. By W. TURTON, M.D. F.L.S. This very useful work contains both the Generic and Specific Characters of all the Quadrupeds, Birds, Fish, Reptiles, Worms, Shells, Corallines, and Animalculæ, inhabiting Great Britain. 12mo. boards, 10*s.* 6*d.*

COLEOPTERA BRITANNICA, sistens Insecta Coleoptera Britanniae Indigena. Auctore T. MARSHAM. *London.* 8vo. boards, 16*s.* **THE SAME,** in two Volumes, with 30 coloured plates, 1*l.* 6*s.*

TESTACEA BRITANNICA; or Natural History of British Shells. By G. MONTAGU. *Romsey,* 1803, 4to. boards, 2*l.* 2*s.* **THE SAME,** fine paper, coloured, 4*l.* 4*s.*

SUPPLEMENT to the above. *Exeter,* 4to. boards, 1*l.* 1*s.* **THE SAME,** fine paper, coloured, 2*l.* 2*s.*

ELEMENTS OF CONCHOLOGY according to the Linnaean System, illustrated by 28 plates drawn from Nature. By the Rev. E. I. BURROW, A.M. F.R.S. F.L.S. Mem. Geol. Soc. *Lond.* 1825, third edition, boards. 16*s.*; or with plates coloured, 1*l.* 11*s.* 6*d.*

A SYNOPTICAL CATALOGUE of British Birds, intended to identify the Species mentioned by different names in several Catalogues already extant. By T. FORSTER, F.L.S. &c. &c. *Lond.* 1821, 8vo. boards, with a coloured plate of the Strix Scops. 3*s.* 6*d.*

BRITISH ORNITHOLOGY, containing Portraits of all the British Birds, including those of Foreign Origin which have become domesticated; drawn, engraved, and coloured by JOHN HUNT. *Norwich,* 1818, 8vo. parts 1—15, each Part 9*s.*

SUPPLEMENT TO THE ORNITHOLOGICAL DICTIONARY; or Synopsis of British Birds. *Exeter,* 1813, 8vo. plates, boards, 14*s.*

Books Published by W. Wood, 428, Strand.

SAXIFRAGEARUM ENUMERATIO. 82 pagg. Auctore A. H. HAWORTH, F.L.S. Accedunt Revisiones Plantarum Succulentarum. 209 pagg. *Lond.* 1821, 8vo. boards, 10s. 6d.

NATURALIST'S MISCELLANY. By G. SHAW, F.R.S. &c. In 267 Numbers, containing 1064 Plates coloured, 33*l.* 17*s.*

Numbers to complete sets, or any of the Plates of this work may be had separate in any quantity, for the purpose of illustrating other books, at 6*d.* each, coloured.

ZOOLOGICAL MISCELLANY ; being descriptions of new, or interesting Animals, illustrated with coloured Figures drawn from Nature. By W. E. LEACH, M.D. F.L.S. &c. *Lond.* 1814—17. 3 Vols. 8vo. 4*l.* 10*s.*

This work contains many interesting animals from New Holland.

SKETCHES REPRESENTING THE NATIVE TRIBES, ANIMALS, AND SCENERY OF SOUTHERN AFRICA, from Drawings made by the late Mr. SAMUEL DANIELL. Engraved by WILLIAM DANIELL.—Royal Quarto. Price Three Guineas in boards ; with the Plates on India paper, Four Guineas.

The illustrations which accompany this work were executed by Mr. S. Daniell with the utmost care and fidelity, and all the subjects contained in the volume are studies from the life. Mr. Daniell was indefatigable in the pursuit of his object, and always made himself master of the actions and habits of an animal before he committed it to paper.
